## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

The disclosure is objected to because of the following informalities: there is no description of Figure 11B in the Brief Description Of The Drawings.

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Green et al (US 7,239,906). Green et al shows a MRI system that includes a patient supporting system 146 with a carriage 116, an elevator frame 118, a bed 120, and an actuator 122. The actuator 122 is used to push the carriage 116 along a set of rails 117, elevating the elevator frame 118, and tilting the bed around a pivot axis 119 attached to the carriage 116. A support controller 123 to control the actuator 122 (column 6, lines 28-41). The support controller 123 can be computer controlled, but may also include a dead man's switch as described in column 7, lines 15-20 to interrupt the operation of the actuator 122.

***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bellingroth (US 6,201,481), Cook et al (US 6,516,478), Martin (US 4,534,077), Kaneko (US 4,463,463), Weiland (US 3,874,728), Elliott (US 4,470,030), and Kowalski et al (US 4,724,554) show human body supports that have integrated safety devices in the form of cut off switches which are of particular interest.
